

Section 6.2 Exercises

Directions: For exercises 1 – 4 match each trigonometric function with one of the following graphs.

1. $f(x) = \tan x$

2. $f(x) = \sec x$

3. $f(x) = \csc x$

4. $f(x) = \cot x$

Directions: For exercises 5 - 7, find the period and horizontal shift of each of the functions.

5. $f(x) = 2\tan(4x - 32)$

6. $h(x) = 2\sec\left(\frac{\pi}{4}(x + 1)\right)$

7. $m(x) = 6\csc\left(\frac{\pi}{3}x + \pi\right)$

Directions: For exercises 8 - 17, sketch one period of the graph for each of the following functions.

8. $f(x) = 2\tan(4x)$

9. $h(x) = 2\sec\left(\frac{\pi}{4}x\right) + 1$

10. $j(x) = \tan\left(\frac{\pi}{2}x\right)$

11. $f(x) = 4\tan(x)$

12. $f(x) = 2\csc(x)$

13. $f(x) = -\frac{1}{4}\csc(x)$

14. $f(x) = 4\sec(3x)$

15. $f(x) = -3\cot(2x)$

16. $f(x) = 7\sec(5x)$

17. $f(x) = \frac{9}{10}\csc(\pi x)$
